SOLAR POWER

And so the installation of the solar panels has finally begun! The installation was originally supposed to take place in May but according to our distributor, there has been a shortage of solar panels available from the manufacturers, which has caused the delay.

The installation on the roof where they have begun work is expected to be done by the turn of the month (September/October). Currently, there is no work planned on the weekends or after 6 PM on weekdays.

ASBESTOS

Asbestos has been found in the glue that was used for the original linoleum floors and the original bathroom carpets. This is not a hazard as long as the floor is intact, but expert help with sanitization is needed if the floor is removed or changed. If you, during a renovation, suspect that there is asbestos in any material, order an analysis and contact the board.

There is also asbestos in the wall boards of the balconies, so make sure not to drill in them.

CODE FOR RESERVING WASHING MACHINES

If you need a new code for the laundry booking system, please contact the caretaker through HSB.

GARBAGE

It wouldn't be a Tunahus newsletter without a section about the garbage!

We are all responsible for our garbage – and we are all playing for the waste management, too! In previous newsletters, you can find more information about how to sort your garbage, but three steps that make a big difference are:

- Larger waste is to be thrown in the container at the back of the house. The lock is opened with your regular key.
- Fold/press/stomp on boxes to make them less bulky
- Do not put any garbage on the ground!
